

Activity 1

Chronic Condition Management Mini Data Audit

RACGP Accredited Activity ID: 1162924 – 1 hour measuring outcomes.

What's involved

In February 2023, the Strengthening Medicare Taskforce released a report advocating for the implementation of Voluntary Patient Registration (VPR). Currently, patients in Australia can visit multiple GPs or clinics without formally registering with a specific practice.

While this flexibility offers choices, it can also result in fragmented care and inefficient resource allocation. Patients with chronic diseases and complex care needs are one identified group that may benefit from improved continuity of care that comes with VPR. This mini data audit, using PenCS CAT4, will help you identify patients with complex care needs for potential MyMedicare enrolment and develop a practice improvement plan.

To complete this activity, you will need:

- Strengthening Medicare Chronic Condition Management QI Activity
- PenCS CAT4

Contact your [COORDINARE Health Coordination Consultant](#) if you require assistance accessing the above.

Learning outcomes

1. Describe the benefits of enrolling patients with complex health needs in MyMedicare.
2. Review practice data to identify patients with complex health needs who would benefit from registering for MyMedicare.
3. Develop strategies to increase awareness and participation rates in MyMedicare for patients with complex health needs.

Activity 1

Chronic Condition Management Mini Data Audit

RACGP Accredited Activity ID: 1162924 – 1 hour measuring outcomes.

Step 1

Email COORDINARE's events team (events@coordinare.org.au) to advise your intention to undertake this activity. Please make sure you provide the following:

- First name, last name
- Primary place of practice
- Role in practice (e.g. GP, Nurse, Practice Manager etc)
- CPD number if applicable

Step 2

Choose one patient cohort with complex health conditions from the [Quality Improvement Activity](#) and follow the instructions under [Mini Audit CDM Instructions](#) to complete your activity.

If you wish to complete multiple searches and receive CPD hours for each search you must submit an individual improvement plan for each search.

IMPORTANT NOTE: Ensure you save a copy of your Improvement Plan as you will need to return it to events@coordinare.org.au as evidence for your CPD hours to be credited and/or a statement of completion to be provided. Do not share any identifiable information.

Step 3

Finally, email your completed Improvement Plan to events@coordinare.org.au

NOTE: Within one week of your satisfactorily completed documents being received, GPs will be credited with 1.0 MO hour, and certificates will be provided.
